Parts for 60 kits

- | | |
|-----|---|
| 60 | Tops all cut (1x8x9.875) – drill holes in tops for large nail and 4 small nails |
| 120 | Sides all cut (1x6x14.875) - drill holes for rope and 4 screws |
| 120 | Perches all cut (1x2x5.5) - drill holes for nails |
| 60 | Mid-section all cut (1x6x5.5) - drill large hole to hold bottle. |
| 60 | Rope pc.'s cut |
| 60 | Soda bottles (2 liter - scouts bring) drill large hole in center bottom. |

Each scout should bring - Eye protection (safety glasses)

- 1 appropriately sized hammer (smallish)
- 1 #2 Phillips manual screwdriver
- Please DO NOT bring power drill drivers.
- Their own empty Soda Bottle (2 liter)
- Please have a talk with your boys ahead of time about proper tool behavior :-)

It is desirable for all scouts to have the same experience. Yes, it will be harder for them to turn the screws (8) by hand, but with help perseverance to a great end can be taught. The scout manual does not reference young scouts using power tools. If one scout uses a power drill they all will want to.
